Grease Control - Lift Station Maintenance

Product Description

BIOCUBE HG is an improved biological product, specifically formulated and packaged for use in lift stations. To assure optimal performance of these organisms, under the toughest conditions, they are produced and blended together with "high potency" nutrients and stimulants.

BIOCUBE HG also contains specialty penetrants and surfactants which loosen and liquefy heavy grease deposits, thereby assisting in their biodegradation.

SLOW RELEASE
disperses bacterial product as it dissolves!

How long will it last?

Field experience has shown that in a pumping station with a flow of 500,000 gpd, the BIOCUBE HG should last 30 days. This is not to say however that in a station with a flow of 50,000 gpd that the BIOCUBE HG will last 300 days. We have had reports of the BIOCUBE HG lasting as long as three weeks. One customer with a pumping station with a flow of 780,000 gpd reports that the product lasts on an average of 40 days.

Fats, Oils and Grease

"It (BIOCUBE HG) pays for itself by reducing the need for suction trucks, jetting the lines and less maintenance of floats and lift stations."

- BIOCUBE HG customer

Grease in a Scum Pit:

Six foot deep grease accumulation eliminated in thirty days!

City of Boston, Massachusetts has used BIO-SYSTEMS product since 1993 for routine, cost effective sewer maintenance.
